Control Sheet

1. Setup Computer.

   (a) Start in order: OBS, Audacity, Overcooked! 2, Zoom.

   (b) Start meeting on Zoom and check AutoSizer is active

   (c) Prepare Tutorial Level. .

2. Once participant(s) walk(s) in:

   - One runner: Welcome, sign-in, consent.
   - One runner: Start recording on OBS and Audacity – **make sure waveform is recording on Audacity.**

3. Begin Tutorial.

   - Instructions:
   - "You are going to be playing a video-game with another participant"
   - Depending on condition: "You will start with being able to see / not being able to see your partner. They will also be able / not be able to see you."
     - Place cardboard depending on condition.
   - "Regardless, througout the experiment the webcam will be recording you for later analsys, no researchers will be watching your feed live."
   - "We're going to start with a tutorial to intruduce you to the game, a sheet with the keyboard controls is presented, and I'd like to stress that you can emote to your parter by pressing E and an arrow key."
   - "Please introduce yourself to your partner and begin when you're both ready"

4. Continue with First Condition.

   - "Any questions before we continue?"
   - Setup the first level of the counter-balance
   - "Begin whenever the both of you are ready, and knock on the door when you're done."
   - Continue for the next 3 - 4 levels.
   - "For blocks 6 - 10, you will be familiarized with the complex tone. For blocks 6 - 10: Odd trials will contain **no complex tone** and event trials will **contain a complex tone**."
   - "No high tone will be presented for blocks 6 - 10"
   - "This is not a **testing phase** but a **familiarization phase**. Focus on learning the sounds of the different tones – a green box will highlight the correct answer."
   - "There will be very good instructions so make sure to **read them completely and carefully.**"
   - "I'll stay in and watch your **first block** in case you have any questions."

5. Start first condition.

6. Start second condition.

7. Post-experiment survey.

   - Can be found in:
     - Kawamoto Drive
     - FireFox Bookmarks
     - Slack

8. Prepare for next participant.

   - Check **path** and **counterbalance**
     - You need to remove ˜\audab\ and all subfolders from the path.
     - After, you can start from the top again without issues.
   - Prepare Hearing Test

General Instructions

- Feel free to hold this with you and read off of it – no need to memorize. It also really helps cut down on differences between participants if you say the exact same thing everytime.

Trouble Shooting

- Shadowing
